#### **DETAILED ACTION**

This action is responsive to the paper(s) filed 10/20/04.

#### Election/Restrictions

Claims 16-19, 24-30 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 10/20/04.

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-3, 5-8, 11 are rejected under 35 U.S.C. 102(a) as being anticipated by Eckhoff (Eckhoff, Jean, "News Briefs", 1-10-2000, "Convenience Store News," v36, n1, p14).

Regarding claims 1, 2, 6, 11, Eckhoff teaches bank machines which provide customized advertising based on facial recognition technology. This inherently provides taking a photograph, extracting the face, analyzing a first characteristic (the features/shape of the face) and presenting targeted ads. The presentation of different ads, targeted for one person vs. another person is taken to provide "switching" the ad content/image in accordance with the first characteristic. The screen that shows the ads is taken to be an image display apparatus. The plurality of ATM/bank machines

25

which provide this advertising are taken to inherently be on the bank's communication network.

Regarding claim 3, targeting customized ads to users is taken to inherently include estimation of a characteristic such as "this person would likely be receptive to this selected ad."

Regarding claim 5, the ad selected for display to the user is taken to be a higher priority ad than other, non-displayed ads.

Regarding claims 7, 8, the ATM machine could be considered a game apparatus where the game played by the user is "what the heck is my PIN number again?". There are no features claimed which differentiate an ATM networked computer with a computer "game apparatus".

## Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 4, 9, 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Eckhoff.

Regarding claim 4, Official Notice is taken that it is well known to use identified characteristics about a user and estimate demographic characteristics in order to provide a basis for targeted advertising. It would have been obvious to one of ordinary

10

15

20

skill at the time of the invention to have relied upon such estimated demographics for the basis of ad customization.

Regarding claims 9, 10, it would have been obvious to one of ordinary skill at the time of the invention to have provided any type of well known display such as a television monitor with the system of Eckhoff. The displayed advertisement is inherently in a specified area of the screen.

Claims 12-15, 20-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Eckhoff in view of Fridman in view of Fridman (Fridman, Sherman, "Bans Eye Iris Scan Identification Technology," 12-9-1999, Newsbytes).

Regarding claims 20-23, Fridman teaches specifics of an customized ad banking system whereby user characteristics are identified biometrically, compared to stored images of the customer base and whereby customized ads are presented to the user based on this information. It would have been obvious to one of ordinary skill at the time of the invention to have provided a centralized storage of previously-captured Eckhoff's user faces so that the targeted advertising can be accomplished. The ad selected for display to the user is taken to be a higher priority ad than other, non-displayed ads.

Regarding claim 12, it would have been obvious to one of ordinary skill at the time of the invention to have stored the user profiles at a central server so that the plurality of ATMs can access the centralized required databases and deliver advertising across the network.

5

15

20

Regarding claims 13-15, Fridman teaches that the targeted ads can be displayed on a screen or by hard copy (mail). It would have been obvious to one of ordinary skill at the time of the invention to have provided a hard copy of the ads to the user at the ATM by way of the well known receipt printer. As stated above, the presentation of different ads, targeted for one person vs. another person is taken to provide "switching" the ad content/image, regardless of the medium of the output.

### Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Giraud (US5966696) teaches complex image capturing systems that detect faces of nearby people in order to present advertising to them [col 2, 5, 6].

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffrey D. Carlson whose telephone number is 703-308-3402. The examiner can normally be reached on Mon-Fri 8:30-6p, (off on alternate Fridays).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eric Stamber can be reached on 703-305-8469. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
